

Job Guidance

We have business Japanese classes as part of our intensive course program. We offer advice regarding careers for those who are enrolled in these classes.

We provide support for students to find suitable job opportunities by offering basic information and individual career guidance, although we are unable to guarantee that they will receive an offer of employment.

We also give guidance about applying for permission to change status of residence to working visa status.

Students must satisfy the following requirements :

1. Students are required to have college student visa status
2. Students are required to hold a bachelor's degree from a 4-year college or university in their home countries.
3. Students are required to have business experience for 3 years approximately.
4. Students are required to have a high level of Japanese language ability.
